Title (description) Boston Reconfiguration For Release A Porting			
Documents Affected		Source Nos (RID, NCR, etc.) or Tech Reference	
RTM Change <input type="checkbox"/> Start New Baseline <input checked="" type="checkbox"/>			
Problem Boston is currently configured with Clearcase software to perform CM functions. The CM functionality should be reconfigured to another platform, freeing Boston to perform as the porting platform for Release A. The VOB (database) sub function has already been removed from Boston however the Views sub function is still resident. The new configuration will designate a Clearcase Views server which will service the 300 accounts currently running on Boston and Triton. The processing requirements for the Views server have not yet been defined..			
Proposed Solution 1. Identify the requirements for running 300 Views on a single View server. 2. Identify a platform with the necessary requirements. 3. Progressively shut down Views on Boston by groups and move to the new platform.
